This is a great buy for the servo arm and techmarine pack alone. The conversion beamer is very well done and I am looking to incorporate some of these into a pre-heresy army. No casting flaws and no shift along the parting line. Great product guys.

Combi Weapon Magnetic Kit

Price: \$5.00

[Ask a question about this product](#)

This Chapterhouse Studios sculpted kit consist of one bolter combination or combi-weapon body, one flamer attachment, one grenade launcher attachment, one plasma gun attachment and one melt gun attachment. We also include 5 rare-earth magnets that fit in the pre-drilled holes on each attachment (the holes and Magnets are 1/16th inch, please note that due to the casting process, these holes sometimes do not fully form on the Bolter.)

This is a pewter kit that allows you to switch out your special weapon choices anytime you want. The magnet has the strength to keep the attachments from falling off with pretty heavy handling. Coupled with our unique fitting design, there is little chance of losing the attachments when on the mini.

Scaled for 28mm models.

This is a pewter kit.

Infantry Model shown below for scale purposes is produced solely by Games Workshop PLC and used for scale purposes only.

Very nice casting. The parts required little clean up and the combi parts meshed very well. All the holes were open on my set and the small magnets provided work perfectly.

### SPACE WOLVES ARMIES

## TROOPS

The Grey Hunters and Blood Claws are the real backbone of a Space Wolves force, and a unit of each is a good start when collecting an army. Like all Space Marines they are highly skilled and difficult to take down. To enhance this, it's best to take them in large units, where their numbers increase their chances of survival.

## FAST ATTACK & HEAVY SUPPORT

Long Fangs

Leman Russ 'Exterminator'

The fast and long-ranged units of the Space Wolves are best used to back up the infantry squads. Bikes can make rapid attacks along the flank, while Long Fangs provide heavy firepower or tank-busting support. The Space Wolves are the only Chapter to use a Leman Russ battle tank, the mobile and deadly 'Exterminator' variant. The Exterminator is perfect for cutting through enemy light vehicle and infantry squads.

# Space Wolves Wolf Guard Terminators

## Space Wolves Wolf Guard Terminators

The Wolf Guard are the hand-picked battle-brothers that fight alongside each Great Company's Wolf Lord. Each has earned his place through some heroic feat of arms. Wolf Guard Terminators are a brotherhood of hulking, high-invincible champions, each eager to dispense his own particular brand of death.

This box set contains five multi-part plastic Space Wolves Wolf Guard Terminators. This 100-piece set includes: five different leg variations, five torso variants and 13 different shoulder guard variants, and 13 heads. Also included are: four sets of wolf claws, an assault cannon, four thunder hammers and storm shields, a heavy flamer, five storm bolters, three power fists, two chainfists, a frost axe, and a power sword. Models supplied with 40mm round bases.

Availability: Usually ships within 24 hours.
